

Moving Led Displays

From AUM Infotech Pvt Ltd

LED display – with Real Time Clock (English):

LED display – with Real Time Clock (Local Language):

This ideal, indoor/outdoor window display offers message impact from a distance of 15 ft. to 2.0 ft day and night. Our display design increases image contrast and provides shading from the sun. We use super-bright LEDs and 3 inch tall characters to create dazzling, moving messages you know your customers will notice.

The AUM Moving Display includes GPRS connectivity that allows you to instantly enter promotional messages at a moment's notice. The exclusive Automode™ function will allow you to enter messages within seconds - without reading any manuals! You may also store messages in memory and schedule them to appear at specific times of the day or week.

The RS232/485 PC interface can be used to connect one or multiple displays to your desktop computer by purchasing optional software.

Replace the reoccurring cost of unsightly, faded static signs with one-time investment in electronic advertising. There is no more effective or cost effective way to advertise, period.

Standard Features:

- ✓ GPRS programs the display using your mobile phone
- ✓ RS232 or RS485 serial port connects one or multiple displays to your PC
- ✓ Bright, large character size: 3.0"
- ✓ 26 exciting operation modes
- ✓ One year warranty, indoor use only
- ✓ Store, schedule and display over 80 messages
- ✓ 5 Operation speeds for each message
- ✓ 6 Character fonts for message impact
- ✓ Create your own graphics & logos

**flexible solutions for
your business needs**
